

Refreshed PVPC eLearning Course Journey

Paramedic

Meet Jasmin (she/her), a Paramedic who provides direct care in a variety of workplaces, including uncontrolled environments, client homes, and facilities. As Jasmin makes her way through the course, she has the ability to choose all of these scenarios. Since Jasmin uses behavioural care plans, she will receive related information.

SCENARIOS AND ADDITIONAL CONTENT

In the refreshed Provincial Violence Prevention Curriculum (PVPC), all participants learn the same core skills, while having the opportunity to choose to practice those skills in scenarios that most closely apply to their role and workplace. Some participants also receive additional content. This course is designed for people in all healthcare workplaces, including hospitals and facilities, community and client homes, and long-term care.

Facility

Uncontrolled Environment

Client's Home

Long-term Care + Other Sites

Acute Care
